

BIRCH CUTLERY

- 100% home and industrial compostable
- Strong and durable
- Flexible and microwavable
- Knife with serrated edge, sharp fork prongs, deep spoon

FSC® Certified From Sustainably Managed Forests FSC® C159214

The Forest Stewardship Council ensures that all birch used has been sustainably grown with the planet as a priority.

This cutlery is 100% compostable and biodegradable. These grown utensils replace plastic alternatives that take up to 500-1000 years to decompose in landfills and clog up our waterways.

NATURAL ALTERNATIVE TO PLASTIC

Birch is an abundant and relatively fast-growing hardwood species that causes minimal destruction of biodiversity when cut down.

40 billion pieces of plastic cutlery are thrown away every year. Have your meal guilt-free with Greenlid's compostable birch cutlery!
